

NETWORKING+

REACH YOUR TARGET AUDIENCE

Networking+ continues to offer an in-depth focus on voice & data networking for enterprise users. By delivering your message via the publication, to our e-newsletter recipients, on the website and amongst our social media followers, Networking+ offers a unique media combination. Using these platforms will put your products and services in front of more than 25,000 communications, network, IT and DC professionals across the UK enterprise marketplace. This is a community that purchases, selects and influences the specification of voice & data products and services for increasingly complex enterprise, campus, national and international networks – your existing and potential customers

OUR EDITORIAL EDGE

Strength, focus and quality of editorial remains a priority for Networking+ and works hard to create an unrivalled readership.

Our core areas of editorial focus are based upon four main aspects of developing voice & data networks for the enterprise:

- Building the network: premises infrastructure
- Running the network: hardware
- Maintaining the network: network intelligence
- Scaling the network: expanding connectivity

Within these core areas our all-encompassing editorial coverage spans the following technologies and services:

- Fixed LAN & WAN
- Wireless LAN & WAN
- Data centres
- Big data
- Cloud & managed services
- Virtualisation
- IoT/Smart cities
- Mobile & remote enterprise connectivity
- Security & compliance
- Storage & hyperconvergence
- Business continuity & disaster recovery
- Unified communications
- Network testing, management, monitoring & optimisation
- MANs
- PSNs
- Training & career development
- SD-WAN
- Critical comms
- Power
- Remote connectivity
- BYOD
- AI
- Cables and cable management
